Professional Summary

Final-year Computer Science Engineering student with a strong foundation in programming and software development. Experienced in working on projects, internships, and technical competitions that have strengthened problem-solving, teamwork, and analytical skills. Eager to learn new technologies, take on challenges, and contribute positively to organizational goals.

Education

- **B.E. COMPUTER SCIENCE AND ENGINEERING (2023-2027)**
Francis Xavier Engineering College
2023-2027
- **HSC - CLASS XII (2022-2023)**
Rose Mary Model School
Percentage: 86%

Internship Experience

Salesforce | Intern

Jan 2026 – Present

Learning Salesforce CRM, customer segmentation, data management, and business automation concepts through hands-on training.

Edge Matrix Corporation | Industrial AI & Deep Learning Intern

2025 – 2026

Completed a one-year internship focused on Industrial AI and Deep Learning, gaining experience in computer vision, model development, and AI-based industrial applications.

Borgwarner morse systems | Project Intern

2025 (2 weeks - Chennai)

Developed a real-time industrial fault detection system and gained practical exposure to industry workflows and technologies.

Web Development Intern

Qantlers | 15 Days

Completed training and practical tasks in web development technologies.

Web Development Intern

Eval Bench | 1 Week

Gained foundational knowledge of web development through hands-on exercises.

Skills

- Programming Languages: C, Python, Java
- Machine Learning: Model development, experimentation, data preprocessing (Python, Google Colab)
- Tools & Platforms: Visual Studio Code, Google Colab, Git & GitHub
- Web Development: Frontend Development
- IoT & Embedded Systems: Arduino, Raspberry Pi 4, sensor-based projects
- Data Analytics & Visualization: Microsoft Excel, Power BI

ACHIEVEMENTS

First Prize – VISAI 2025 (International Level)

- Secured 1st place at VISAI 2025 hosted by Vel Tech, Chennai for the project “Real-Time Health Monitoring and Diagnostic System for Electric Vehicles” based on a real-world problem statement from Mahindra & Mahindra Ltd.

Second Runner-Up – National Hackathon 2024 (Kalasalingam University)

- Secured Second Runner-Up position and won a ₹20,000 cash prize in a 24-hour national-level hackathon hosted by Kalasalingam University.

Second Prize – Malaysia Project Expo (MAHSA University)

- Awarded 2nd prize at MAHSA University, Malaysia for the project “Smart Energy Forecasting System”, focused on predictive energy management and optimization.

Third Prize – VISAI 2026 (International Level)

- Secured 3rd place for “Machine Health Monitoring System”, focusing on predictive maintenance and industrial machine monitoring.

PROJECTS

1.EV Health Monitoring System (IoT, ML, Raspberry Pi, AR)

Real-time vehicle health monitoring system using sensors and machine learning for predictive diagnostics and performance tracking.

2.Medicine Recommendation System (Machine Learning, Python)

ML-based system that recommends suitable medicines based on user symptoms using classification techniques.

3.Smart Energy Forecasting System (Machine Learning, Data Analysis)

Predictive model for forecasting energy consumption to improve efficiency and planning.

4.Machine Health Monitoring System (Machine Learning, IoT)

Industrial monitoring system that detects machine condition and predicts failures for preventive maintenance.

Skills

- 1.Quick learner
- 2.Leadership
- 3.Communication skills
- 4.Teamwork
- 5.Problem-solving
